

School Bus Accident Protocol

The Board of Education of the Bethlehem Central School District believes that the safety of all students riding on school transportation is most important. Great care and measures of support are in place to ensure that students are safe at all times.

Therefore, the Board directs the Superintendent to implement the following guidelines and protocols with the school district. At the beginning of each school year these guidelines will be reviewed by the administration and building staff to familiarize them with the procedures necessary to ensure the safety and care of students involved in a bus accident.

After any accident or such occurrence these procedures should be evaluated and assessed for effectiveness. In the event of changes that need to be made the Superintendent will be empowered by the Board to adjust the guidelines accordingly with subsequent notification to the Board.
